SUMMARY

Senior Product Manager with 7+ years of experience, 5+ in product, building 0-to-1 B2B SaaS, B2C, marketplace and AI products across India and Africa. Evaluated three new markets for an on-demand fuel delivery company, then launched Zimbabwe, building the B2B business from zero to 50+ enterprise and regional clients and 8 active depots. Took the company's Fuel Management System to a live v3 with AI demand forecasting built in. In India, shipped a vendor onboarding platform that cut activation time from over a day to under half a day. Now Country Head, running the country P&L while keeping release ownership of both platforms.

EXPERIENCE

Country Head and Product Manager | FuelBuddy | Harare, Zimbabwe | May 2026 – Present

Asked by the CEO to run the Zimbabwe business alongside the product role; reports to the Business Head in India.

- Set Zimbabwe release priorities and feature trade-offs for the Fuel Management System (FMS) and Vendor Management System (VMS) on the central roadmap, against North Star KPIs of monthly volume and active depots.
- Write product specs, user stories, acceptance criteria and compliance rules for the Zambia and Nigeria rollouts, and write Zimbabwe Revenue Authority (ZIMRA) tax rules up as system specs.
- Own the Zimbabwe P&L across dynamic pricing, procurement, logistics and sales, within Zimbabwe Energy Regulatory Authority (ZERA) and ZIMRA rules.
- Own customer credit and collections, covering credit risk and daily reporting.
- Plan replenishment and depot inventory from daily volume data in Excel and SQL, allocating supplier volumes and working capital across 8 depots with zero stock-outs since Aug 2025.
- Hired and now lead an 8-person team across business development, logistics and finance; coordinate 50+ colleagues in Mozambique, Zambia, the UAE and India.

Product Manager, Zimbabwe | FuelBuddy | Harare, Zimbabwe | Apr 2025 – Apr 2026

Led FuelBuddy's market research and competitive evaluation of Zimbabwe, Zambia and Nigeria, then moved to Zimbabwe for market entry, business development and FMS product fit.

- Led go-to-market and enterprise sales: ~15 suppliers in month one, incl. global commodity traders and the national oil company on USD settlement, then 50+ enterprise and regional clients.
- Brought the FMS to a live v3 in Zimbabwe for a multinational beverage bottler's deliveries, with a standard reporting SOP to its Zimbabwe head office.
- Built AI demand forecasting into the FMS, live today: it predicts supplier booking volumes from 3 months of daily procurement and consumption records, with planner review on each cycle.
- Ran 40+ discovery interviews with transporters, vendors, fuel stations and corporates; what they reported fed the FMS and VMS backlog.
- Grew the B2B bulk-fuel supply business from zero to 8 active depots.
- Improved unit margins through pricing and supplier mix.

Product Manager | FuelBuddy | Gurugram, India | Jan 2023 – Apr 2025

One of four PMs, working cross-functionally with the CEO, CTO and MD and 15 engineers on B2B and B2C products. Ran delivery in Jira, Confluence and Salesforce; built funnel dashboards in Amplitude, Tableau and Power BI.

- Shipped the procure-to-pay VMS end to end (onboarding, purchase orders, GST-compliant invoices, payments), with KYC and validation rules that cut vendor activation from over a day to under half a day.
- Built the VMS from 300+ pump-owner interviews; adoption grew to 150+ vendors.
- Defined 100+ FMS requirements (tank gauges, flow meters, RFID); its 6-month pilot at a major Indian steel producer cut loss, theft and spillage.
- Cut average last-mile delivery time from 60 to 55 minutes by root-causing failures in IoT order sync, route optimisation and slot booking, with A/B-tested fixes.
- Specified and shipped UPI Intent and QR checkout for the B2B platform; an internal pilot with 200+ employees across four city clusters ran 2,000+ transactions in month one.
- Designed Project Arjun with the GM and CEO, a consumer commerce app for fuel and station products (catalogue, pre-booking, QR redemption, wallet cashback), piloted in Delhi NCR and Bengaluru.
- Secured FuelBuddy's first Indian Oil (IOCL) retail station lease.

Associate Product Manager | Legal Suvidha (LegalTech SaaS) | Gurugram, India | Sep 2021 – Dec 2022

- Took the web and mobile MVP from Figma wireframes through engineering to launch within 8 months, turning Indian legal-compliance rules into product requirements.
- Introduced Agile/Scrum, PRD templates and sprint planning for the web and mobile releases, cutting time-to-market by 25%. Owned the Jira backlog and ran Meta and Google Ads campaigns.
- A/B-tested onboarding flows as website visitors grew from ~120 to 1,000+.

Research Associate | Citizens Foundation for Policy Solutions | New Delhi, India | Aug 2019 – Aug 2021

- Designed and coordinated surveys for pollution-control policy research for the Delhi Government, and prepared the research reports and policy drafts.

SKILLS

Product: Product strategy, roadmap, 0-to-1 and MVP, product discovery, user research, PRDs, user stories, acceptance criteria, prioritisation, release management, A/B testing, experimentation, North Star KPIs, success metrics, product analytics, funnel analysis, adoption, product lifecycle, Agile/Scrum, go-to-market (GTM)

AI and Data: AI/ML demand forecasting, human-in-the-loop design, feedback loops, generative AI, LLM agents, RAG, evals, prompt design, guardrails, SQL, data analysis, Python, LangGraph, LLM APIs

Platform: B2B SaaS, multi-tenant SaaS, B2B commerce, e-commerce, marketplaces, REST APIs and integrations, Shopify API, IoT (tank gauges, RFID, flow meters), UPI payments, procure-to-pay workflows, purchase orders, supply chain, inventory optimisation

Tools: Jira, Confluence, Figma, Amplitude, Tableau, Power BI, Excel, Salesforce, Supabase, Postman

Business: P&L ownership, revenue, margin, unit economics, operational efficiency, dynamic pricing, market entry, international expansion, business development, supplier partnerships, credit risk, working capital, procurement, vendor management, customer success, account management, contract management, RFPs, competitive battle cards, Meta and Google Ads, stakeholder management, team leadership

PROJECTS

Personal builds, separate from employer work. Full portfolio and demos at pryank18.github.io.

Msafara | Multi-agent AI prototype for B2B tourism vendor coordination | Python, LangGraph, LLM APIs

- Prototyped solo for tour operators and DMCs: LLM agents negotiate within prompt guardrails, pull vendor context through RAG and hand off to a human when a call falls outside policy, with evals on each agent decision.

Dispatch OS | Multi-tenant B2B e-commerce and quick-commerce SaaS for FMCG distributors | Supabase, REST APIs, Postman, SQL

- Shipped per-tenant ordering, credit control, inventory and SKU catalogue in an MVP demoed in distributor pitches.

Pravesh | Exam-prep app for UPSC, SSC and banking aspirants | Convex

- Scoped the product, content structure and a free model with voluntary UPI support; live.

Freelance client work | Alongside full-time roles | 2021 – 2024

- Developed a Shopify e-commerce app integrated with 3+ merchant stores via the Shopify API, for separate clients.

EDUCATION

MBA, AI for Business | O.P. Jindal Global University (online) | Dec 2025 – Dec 2026 (expected)
Master's, AIHC & Archaeology | Deccan College Postgraduate and Research Institute, Pune | 2019
BA (Hons), History | University of Delhi | 2017

CERTIFICATIONS

Certified Product Manager (micro1) · Technical Product Management (PMI via LinkedIn Learning) · Agile Scrum Master (Simplilearn) · Becoming an AI-First Product Leader (LinkedIn Learning) · Professional Diploma in International Business Management (European Open University)

LEADERSHIP & MENTORING

Guest Mentor, IIM Raipur (PGP 2023–25): mentored student groups on international energy-business expansion and fuel management systems.

LANGUAGES

English, Hindi, Punjabi, Marathi
