SUMMARY

Product manager with 7+ years of professional experience, including 5+ years in product roles across B2B SaaS, B2C and platform products. At FuelBuddy, built a Vendor Management System (VMS) for 150+ vendors and an IoT Fuel Management System (FMS) that saved Jindal Steel Plant about INR 4 lakh a month, then launched the Zimbabwe business from zero to 1.5M litres a month by month 10. Now Country Head and Product Manager, with Profit & Loss (P&L) ownership and an 8-person team.

EXPERIENCE

Country Head and Product Manager, Zimbabwe

May 2026 – Present | FuelBuddy (consultant engagement) | Harare, Zimbabwe

Promoted by the CEO in May 2026 to run the Zimbabwe business while retaining product ownership; report to the Business Head in India.

- Set local release priorities for the FMS and VMS from depot and customer feedback, against North Star metrics of monthly litres transacted and active depots, within the central product roadmap owned in India.
- Write user stories, functional requirements and compliance rules to take both systems into two new markets, Zambia and Nigeria.
- Run the Zimbabwe P&L across pricing, procurement, credit, logistics and sales for thin-margin bulk diesel and blended fuel; main regulatory counterparts are ZERA and ZIMRA.
- Manage a six-figure USD customer credit book on a 4–5-day cycle, owning credit risk, collections and daily reporting from a self-built Excel tracker.
- Forecast demand from the daily litres report and allocate supplier volumes against it, using Excel and SQL.
- Lead an 8-person team, including a newly hired business-development manager, and coordinate cross-functional work with 50+ colleagues in Mozambique, Zambia, the UAE and India.

Product Manager, Zimbabwe

Apr 2025 – Apr 2026 | FuelBuddy (consultant engagement) | Harare, Zimbabwe

- Launched the B2B bulk-fuel business from zero to 1.5M litres a month by month 10, setting up banking, procurement, credit, dispatch and reporting under written SOPs.
- Ran 40+ customer-discovery interviews with transporters, vendors, fuel stations and corporates, and turned the findings into FMS and VMS requirements with a live feedback loop into the backlog.
- Brought around 15 suppliers live in the first month, including Trafigura, Oryx, Glencore and NOIC, and settled cross-border USD payments with them.
- Converted 50+ repeat B2B customers in 9 months from a network of 400+ customers, transporters and fleet operators across Harare, Bulawayo, Gweru and three other cities.
- Scoped a full on-site FMS for a major beverage bottler, covering site hardware and digital-payment integration; paused until hardware could be sourced in-country.

Product Manager

Jul 2023 – Apr 2025 | FuelBuddy | Gurugram, India

B2B and B2C products; worked with the CEO, CTO and MD alongside three peer PMs and 15 engineers on PRDs, roadmap, backlog prioritisation and release management in Jira and Confluence.

- Built the Vendor Management System (Project Silver Horse) from 300+ pump-owner interviews to launch for 150+ vendors; standard validation and compliance rules cut onboarding from more than a day to under half a day.
- Saved Jindal Steel Plant about INR 4 lakh a month (20 paise a litre on around 2M litres of diesel) in a six-month IoT FMS pilot; defined 100+ requirements for Automatic Tank Gauges (ATG), dispensers, flow meters, RFID tags and tank sensors.
- Cut average delivery time from 60 to 55 minutes, and by up to 10 minutes on some trucks, through A/B-tested fixes to IoT-server order sync, ops-to-driver order alignment, route optimisation and slot booking.
- Led the 0-to-1 roadmap and PRDs for Project Arjun, a B2C fuel-retail app, with the GM and CEO, including merchant-side UPI Intent and QR checkout with failure handling, refunds and reconciliation.
- Shipped Arjun's checkout in the B2B platform when the B2C launch moved to the next funding cycle; an internal pilot with 200+ employees processed 2,000+ transactions in month one, with funnel and conversion tracked in Amplitude and Tableau.
- Evaluated Zimbabwe, Zambia and Nigeria for Africa market entry, which set up the Zimbabwe launch; a separate trading-area analysis secured FuelBuddy's first IOCL retail station on lease.

Research Associate

Jan 2023 – Jun 2023 | FuelBuddy | Gurugram, India

- Assessed EV-charging and fuel-retail opportunities and turned the research into product and go-to-market inputs; promoted to Product Manager within six months.

Associate Product Manager

Sep 2021 – Dec 2022 | Legal Suvidha (LegalTech B2B SaaS) | Gurugram, India

- Took the web and mobile-app MVP from requirements and Figma wireframes through engineering handoff to launch in 6–8 months.
- Set up the company's Agile product process, including standard PRDs and sprint planning, cutting time-to-market by 25%.
- Owned the product backlog and user stories in Jira, and A/B-tested onboarding flows as website visitors grew from around 120 to 1,000+.
- Used Confluence to maintain product documentation and release notes, supporting cross-functional alignment between product, engineering and operations.

Research Associate (Consultant)

Aug 2019 – Aug 2021 | Citizens' Foundation for Policy Solutions | New Delhi, India

- Researched pollution-control policy for the Delhi Government, including stakeholder and policy analysis; developed research, stakeholder-management and structured-analysis skills later applied to product discovery.

PROJECTS

Personal builds, separate from FuelBuddy; demos at [pryank18.github.io](https://github.com/pryank18)

- **Msafara:** multi-agent AI prototype that coordinates vendors for B2B tour operators, with bounded negotiation and human escalation (Python, LangGraph).
- **Dispatch OS:** multi-tenant B2B e-commerce SaaS for FMCG distributors covering ordering, credit control and stock (Supabase, REST APIs, SQL).
- **Bolt & Bahi:** GST ledger for textile traders with automated tax calculation, tested on 500+ transactions.
- **Depotline:** fuel-depot dashboard combining inventory, pricing and fleet fuel logs with exception alerts.

SKILLS

Product: Product Strategy, Product Roadmap, Go-to-Market (GTM), Product Discovery, Customer Discovery, User Research, PRDs, User Stories, MVP Definition, Backlog Prioritisation, Release Management, Product Lifecycle, KPIs, North Star Metrics, Agile/Scrum, 0-to-1 Products

Growth and Analytics: Data-Driven Decision-Making, Product Analytics, A/B Testing, Experimentation, Funnel Analysis, Cohort Analysis, Acquisition, Activation, Conversion, Retention, Demand Forecasting, Market Sizing, Competitor Analysis, OKRs

Platform and Payments: B2B SaaS, Technical Product Management, Enterprise Workflows, REST APIs, API Integrations, Webhooks, Postman, Catalogue & SKU Management, CRM/ERP, Salesforce, IoT (ATG, RFID, Flow Meters), UPI Intent and QR, Payment Gateway Integration, Checkout, Refunds, Reconciliation, Order Management, AI Agent Prototyping

Business: P&L Ownership, Unit Economics, Pricing, Credit Risk, Procurement, Supply Chain, Logistics, Route Optimisation, Market Entry, International Expansion, Cross-functional Leadership, Stakeholder Management, Team Leadership, Hiring

Tools: Jira, Confluence, Figma, SQL, Advanced Excel, Amplitude, Tableau, Supabase

EDUCATION

MBA, Artificial Intelligence for Business | O.P. Jindal Global University | Expected Dec 2026

MA, Ancient Indian History, Culture and Archaeology | Deccan College PGRI, Pune | 2019

BA (Hons), History | University of Delhi | 2017

CERTIFICATIONS

Certified Product Manager (micro1) | Technical Product Management (Project Management Institute, via LinkedIn Learning) | Agile Scrum Master (Simplilearn) | Becoming an AI-First Product Leader (LinkedIn Learning) | Professional Diploma in International Business Management (European Open University)

ADDITIONAL

Guest Mentor, IIM Raipur (PGP 2023–25): mentored six student groups on international energy-business expansion and fuel-management systems. Languages: English, Hindi, Punjabi, Marathi. Notice period: 30 days.
