## SUMMARY

Product manager with 7 years of experience, 5 in product roles, building B2B SaaS, B2C and platform products in fuel-tech and LegalTech across India and Africa. At FuelBuddy, shipped a Vendor Management System (VMS), a merchant-side UPI checkout and an IoT Fuel Management System (FMS) for industrial fuel sites. Launched the company's Zimbabwe B2B bulk-fuel business from zero in April 2025 and now run it as Country Head with Profit & Loss (P&L) ownership and an 8-person team, while keeping product ownership of the FMS and VMS. MBA in AI for Business, expected Dec 2026.

## EXPERIENCE

### Country Head and Product Manager, Zimbabwe

May 2026 – Present

FuelBuddy (consultant engagement) | Harare, Zimbabwe

Elevated by the CEO in May 2026 to run the Zimbabwe business while keeping product ownership; report to the India-based Business Head.

- Set local release priorities for the FMS and VMS, turning depot and customer feedback into user stories within the central product roadmap owned in India
- Write the workflows, functional requirements and compliance rules to take both systems into 2 new markets, Zambia and Nigeria
- Run the Zimbabwe P&L across pricing, procurement, credit, logistics and sales for diesel and blended fuel, and own the working relationship with the energy and tax regulators
- Own the customer credit book end to end: credit limits, credit risk, collections and daily reporting on a short repayment cycle
- Lead an 8-person local team, including a newly hired business-development manager, and coordinate cross-functional work with 50+ colleagues in Mozambique, Zambia, the UAE and India

### Product Manager, Zimbabwe

Apr 2025 – Apr 2026

FuelBuddy (consultant engagement) | Harare, Zimbabwe

- Launched the B2B bulk-fuel business from zero and built it into a repeat-volume wholesale operation within a year, setting up banking, procurement, credit, dispatch and reporting under written SOPs
- Ran 40+ customer-discovery interviews with transporters, vendors, fuel stations and corporates, and turned the findings into FMS and VMS requirements with a live feedback loop into the backlog
- Brought the supplier base live in the first month, including global commodity traders and national oil companies
- Built a repeat B2B customer base from a wider network of transporters, fleet operators and corporates across Harare, Bulawayo, Gweru and other cities
- Scoped a full on-site FMS for a large beverage manufacturer, covering site hardware and digital-payment integration; paused until the hardware can be sourced in-country

### Product Manager

Jul 2023 – Apr 2025

FuelBuddy | Gurugram, India

B2B and B2C products; worked with the CEO, CTO and MD alongside peer PMs and the engineering team on PRDs, roadmap, backlog prioritisation and release management.

- Built the Vendor Management System from 300+ petrol pump owner interviews to launch; standard validation and compliance rules cut vendor onboarding from more than a day to under half a day
- Defined 100+ requirements for a 6-month IoT FMS pilot at a large steel plant, integrating Automatic Tank Gauges (ATG), dispensers, flow meters, RFID nozzle tags and tank sensors; loss, theft and spillage controls delivered measurable per-litre savings and turned the pilot into a long-term contract
- Reduced average fuel delivery time, with the largest gains on the slowest trucks, through A/B-tested fixes to IoT-server order sync, ops-to-driver order alignment, route optimisation and slot booking
- Led the 0-to-1 roadmap and PRDs for a B2C fuel-retail app with the GM and CEO, including merchant-side UPI Intent and QR checkout with failure handling, refunds and reconciliation
- Shipped that checkout inside the B2B platform when the B2C launch moved to the next funding cycle; ran an internal employee pilot and tracked adoption in Amplitude and Tableau
- Evaluated Zimbabwe, Zambia and Nigeria for Africa market entry, which set up the Zimbabwe launch; separate trading-area analysis secured the company's first leased retail fuel station

## Research Associate

Jan 2023 – Jun 2023

FuelBuddy | Gurugram, India

- Assessed EV-charging and fuel-retail opportunities and turned the research into product and GTM inputs; promoted to Product Manager within 6 months

## Associate Product Manager

Feb 2021 – Nov 2022

Legal Suvidha (LegalTech B2B SaaS) | Gurugram, India

- Took the web and mobile-app MVP from requirements and Figma wireframes through engineering handoff to launch in 6–8 months
- Set up the company's Agile product process (standard PRDs, sprint planning), shortening time-to-market
- A/B-tested onboarding flows through a period of strong website traffic growth

## Freelance Integration Consultant, Shopify API (part-time)

2021 – 2024

Self-employed | Remote

- Delivered Shopify REST API and webhook integrations for 3+ merchant stores: data mapping, catalogue and SKU sync, Postman testing and go-live support

## Research Associate (Consultant)

Aug 2019 – Jan 2021

Citizens' Foundation for Policy Solutions | New Delhi, India

- Researched pollution-control policy for the Delhi Government, including stakeholder and policy analysis

## PROJECTS

Personal builds, separate from FuelBuddy. Live demos at [pryank18.github.io](https://github.com/ryank18)

- Msafara: multi-agent AI prototype that coordinates vendors for B2B tour operators, with bounded negotiation and human escalation (Python, LangGraph)
- Dispatch OS: multi-tenant B2B e-commerce SaaS for FMCG distributors covering ordering, credit control and stock (Supabase, REST APIs, SQL)
- Bolt & Bahi: GST ledger for textile traders with automated tax calculation, tested on 500+ transactions
- Depotline: fuel-depot dashboard combining inventory, pricing and fleet fuel logs with exception alerts

## SKILLS

**Product:** Product Strategy, Product Roadmap, Product Discovery, Customer Discovery, User Research, PRDs, User Stories, MVP Definition, Backlog Prioritisation, Release Management, Product Lifecycle, OKRs, KPIs, North Star Metrics, Agile/Scrum, Go-to-Market (GTM), 0-to-1 Products

**Growth and Analytics:** Data-Driven Decision-Making, Product Analytics, A/B Testing, Experimentation, Funnel Analysis, Cohort Analysis, Acquisition, Activation, Conversion, Retention, Market Sizing, Competitor Analysis

**Platform and Payments:** Technical Product Management, Enterprise Workflows, REST APIs, Webhooks, API Integrations, CRM/ERP, IoT (ATG, RFID, Flow Meters), UPI Intent and QR, Payment Gateway Integration, Checkout, Refunds, Reconciliation, Order Management, Catalogue and SKU Management

**Business:** P&L Ownership, Unit Economics, Pricing, Credit Risk, Procurement, Supply Chain, Logistics, Route Optimisation, Market Entry, International Expansion, Cross-functional Leadership, Stakeholder Management, Team Leadership, Hiring

**Tools:** Jira, Confluence, Figma, Postman, SQL, Amplitude, Tableau, Salesforce, Supabase

## EDUCATION

MBA, Artificial Intelligence for Business | O.P. Jindal Global University

Expected Dec 2026

MA, Ancient Indian History, Culture and Archaeology | Deccan College PGRI, Pune

2019

BA (Hons), History | University of Delhi

2017

## CERTIFICATIONS

Certified Product Manager (micro1) | Technical Product Management (Project Management Institute, via LinkedIn Learning) | Agile Scrum Master (Simplilearn) | Becoming an AI-First Product Leader (LinkedIn Learning) | Professional Diploma in International Business Management (European Open University)

## ADDITIONAL

Guest Mentor, IIM Raipur (PGP 2023–25): mentored 6 student groups on international energy-business expansion and fuel management systems. Languages: English, Hindi, Punjabi, Marathi. Notice period: 30 days.
