PRYANK WADHERA

Senior Product Manager | 0-to-1 B2B SaaS, AI and Platform Products

New Delhi, India | +91 7397829282 | wadherapryank@gmail.com | linkedin.com/in/pryankwadhera | pryank18.github.io | Open to relocation (UAE) and remote

PROFESSIONAL SUMMARY

Senior Product Manager with 7+ years of experience, including 5+ in product roles across B2B SaaS, platform and payments products. Built two 0-to-1 platforms in India, a vendor management system for 150+ vendors and an IoT fuel-management system, then launched FuelBuddy's Zimbabwe business from zero to 1.5M litres a month by month 10. Now Country Head and Product Manager owning the P&L, an 8-person team and rollouts into Zambia and Nigeria. Builds LLM agent prototypes with LangGraph, RAG and evals; MBA in AI for Business (2026).

CORE COMPETENCIES

Product: Product Strategy, Product Roadmap, 0-to-1 and MVP, Product Discovery, User Research, PRDs, User Stories, Backlog Prioritisation, Release Management, North Star Metrics, Agile/Scrum, Go-to-Market

AI: LLM Agents and Orchestration, Prompt Design, RAG, Evals, Human-in-the-Loop Design, AI UX

Data and Platform: Product Analytics, SQL, A/B Testing, Funnel Analysis, Demand Forecasting, B2B SaaS, Multi-tenant SaaS, REST APIs and Integrations, IoT (ATG, RFID, Flow Meters), UPI Intent and QR Checkout

Business and Leadership: P&L Ownership, Market Entry, Pricing, Credit Risk, Procurement, Logistics, Stakeholder Management, Cross-functional Leadership, Team Leadership, Hiring

Tools: Jira, Confluence, Figma, Amplitude, Tableau, Advanced Excel, Postman, Salesforce, Supabase, Python, LangGraph, Claude API

PROFESSIONAL EXPERIENCE

FuelBuddy (consultant engagement) | Country Head and Product Manager | Harare, Zimbabwe | 05/2026 – Present

Elevated by the CEO to run the Zimbabwe business while retaining product ownership; reports to the Business Head in India.

- Set Zimbabwe release priorities for the FMS and VMS within the central product roadmap, measured against North Star metrics of monthly litres and active depots.
- Write user stories, functional requirements and compliance rules to take both systems into two new markets, Zambia and Nigeria.
- Own the Zimbabwe P&L across pricing, procurement, credit, logistics and sales for thin-margin bulk diesel, working with regulators ZERA and ZIMRA.
- Manage a six-figure USD customer credit book on a 4–5-day cycle, covering credit risk, collections and daily reporting.
- Forecast demand from daily litres data in Excel and SQL, and allocate supplier volumes against the forecast.
- Lead an 8-person team, including a newly hired business-development manager, and coordinate with 50+ colleagues across Mozambique, Zambia, the UAE and India.

FuelBuddy (consultant engagement) | Product Manager | Harare, Zimbabwe | 04/2025 – 04/2026

Moved to Zimbabwe to launch the market after leading FuelBuddy's entry evaluation of Zimbabwe, Zambia and Nigeria.

- Launched the B2B bulk-fuel business from zero to 1.5M litres a month by month 10, with banking, procurement, credit, dispatch and reporting under written SOPs.
- Ran 40+ discovery interviews with transporters, vendors, fuel stations and corporates, feeding FMS and VMS requirements into the backlog through a live feedback loop.
- Onboarded around 15 suppliers in month one, including Trafigura, Glencore, Oryx and NOIC, and set up cross-border USD settlement with them.
- Converted 50+ repeat B2B customers within 9 months from a 400+ network of transporters and fleet operators across Harare, Bulawayo, Gweru and three other cities.
- Scoped an on-site FMS for a major beverage bottler, covering site hardware and digital-payment integration; deployment paused pending in-country hardware sourcing.

FuelBuddy | Product Manager | Gurugram, India | 01/2023 – 04/2025

Worked with the CEO, CTO and MD, three peer PMs and 15 engineers on B2B and B2C products, using Jira, Confluence and Salesforce, with funnel analytics in Amplitude and Tableau.

- Built a Vendor Management System from 300+ pump-owner interviews for 150+ vendors; validation rules cut onboarding from over a day to under half.
- Defined 100+ requirements for an IoT fuel-management system covering ATG, dispensers, flow meters, RFID tags and tank sensors, piloted at a major Indian steel producer.
- Cut loss, theft and spillage by 20 paise a litre on 2M litres a month, reaching an INR 4 lakh monthly saving run-rate by month six.

- Reduced average delivery time from 60 to 55 minutes through A/B-tested fixes to IoT-server order sync, driver order alignment, route optimisation and slot booking.
- Led 0-to-1 product strategy, roadmap and PRDs for Project Arjun, a B2C fuel-retail app, with the GM and CEO, specifying UPI Intent and QR checkout.
- Shipped Arjun's checkout in the B2B platform when the B2C launch moved to the next funding cycle; 200+ employees made 2,000+ transactions in month one.

Legal Suvidha (LegalTech B2B SaaS) | Associate Product Manager | Gurugram, India | 09/2021 – 12/2022

- Took the web and mobile MVP from requirements and Figma wireframes through engineering handoff to launch in 6–8 months.
- Set up the company's Agile product process with standard PRDs and sprint planning, cutting time-to-market by 25%.
- Owned the backlog and user stories in Jira, and A/B-tested onboarding flows as website visitors grew from around 120 to 1,000+.

Citizens' Foundation for Policy Solutions | Research Associate (Consultant) | New Delhi, India | 08/2019 – 08/2021

- Researched pollution-control policy for the Delhi Government, designing and coordinating surveys to collect field data for policy analysis.
- Prepared research reports and policy drafts, and engaged stakeholders across the policy process to build support for proposed pollution-control measures.

SELECTED PROJECTS

Personal builds, separate from FuelBuddy. Full portfolio, including Bolt & Bahi and Depotline, at pryank18.github.io

Msafara | Multi-agent AI prototype for vendor coordination in B2B tourism
Tour operators and DMCs coordinate vendors by hand. Designed and built solo: agent orchestration with bounded negotiation, RAG for vendor context, prompt design, evals on agent decisions, human-in-the-loop escalation and an operator-facing AI UX. Python, LangGraph, Claude API. Working prototype; demo on portfolio.

Dispatch OS | Multi-tenant B2B e-commerce and quick-commerce SaaS for FMCG distributors
Distributors run ordering and credit on calls and spreadsheets. Defined and built ordering, credit control, stock, and catalogue and SKU management per tenant. Supabase, REST APIs, Postman, SQL. Working MVP used in distributor pitches.

Pravesh | Competitive-exam prep app for Indian aspirants (UPSC, SSC, banking)
Owned the product end to end: scope, content structure and a free model with voluntary UPI support. Built and deployed on Macaly Cloud and Convex; in internal testing ahead of public launch.

EDUCATION

MBA, Artificial Intelligence for Business | O.P. Jindal Global University | Expected 12/2026
MA, Ancient Indian History, Culture and Archaeology | Deccan College PGRI, Pune | 2019
BA (Hons), History | University of Delhi | 2017
